## SUMMARY

Full-stack and mobile software engineer with 2+ years building and shipping production systems across web, iOS/Android, and desktop. Comfortable owning features end-to-end — from PostgreSQL schema and GraphQL API to React/Next.js frontends, React Native / Expo apps, and Tauri desktop builds. Recurring ownership of high-stakes domains: authentication & 2FA, payments & payouts, role-based access control, and audit/compliance systems. Delivered 850+ commits across 15 products at an early-stage software studio.

## SKILLS

- **Languages:** TypeScript, JavaScript, SQL
- **Backend:** NestJS, GraphQL (Apollo, code-first), PostgreSQL, Knex, Drizzle ORM, Redis, RabbitMQ / Bull queues, JWT, DataLoader
- **Frontend:** React, Next.js (App Router), Tailwind CSS, Radix / shadcn, Zustand, Redux Toolkit, TanStack Table, React Hook Form + Zod
- **Mobile:** React Native, Expo (EAS), Apollo Client, Firebase Cloud Messaging / Notifee
- **Desktop:** Tauri (cross-platform, auto-update)
- **Integrations & Infra:** Paystack, Firebase, Resend / ZeptoMail, Google Maps, Socket.IO, reCAPTCHA v3, GitHub Actions, Cloudflare Workers, DigitalOcean

## EXPERIENCE

### Full-Stack Software Engineer — Nyeova Systems      Sept 2024 – Present

*Built and maintained three flagship platforms plus multiple client products across the full stack.*

- **OneMillion — Crowdfunding platform (NestJS · GraphQL · PostgreSQL · React Native · Tauri):** Owned authentication and account security (email/phone-OTP login, TOTP 2FA with recovery codes, re-authentication). Built role-based access control with permission guards, plus a tamper-evident, hash-chained audit log with database-enforced immutability and cryptographic chain verification. Engineered a milestone-based payouts engine with automated Paystack transfers, webhook reconciliation, and 2FA approval gating. Built consumer mobile app (React Native/Expo) and admin desktop portal (React Router 7 + Tauri). Built marketing site features for OneMillion, migrating the home page from JavaScript to TypeScript and configuring full SEO.
- **Pigeonbolt / Ultra360 — Logistics & on-demand delivery platform (Next.js 15 + Tauri 2 · NestJS · React Native):** Built admin portal flagship bulk-actions system across every data entity backed by transactional GraphQL mutations. Built auto-save forms framework, order dispatch, cash-out finance flows, and URL-persisted data-table infrastructure. Built courier and customer mobile apps (onboarding/auth, redesigned search, in-app tours, OTP recovery).
- **Pigeonultra — Logistics & delivery platform (Next.js · Apollo GraphQL · React Native · Tauri):** Migrated product marketing website to App Router with blog/CMS, ordering flow, and Resend anti-spam contact system. Built bulk-actions system, auto-save forms framework, order dispatch, and cash-out finance flows on admin portal. Built courier and customer mobile apps (onboarding, search, in-app tours, OTP recovery).
- **Client & product work:** Eventify (core author — auth, settings, event pages, creation flow, dual-currency pricing); Pappysko (core author — Google Maps search, listing lifecycle, real-time chat with attachments); Amphibious Medics, Savi EHS, Ayesha Bio, Nyeova (quality assurance, testing, Next.js on Cloudflare Workers — email/contact integrations, SEO, UI delivery).

### Software Developer — WeOrg AI      Feb 2026 – Present

- **Kuro (Community / Property Management Ecosystem):** Engineered both the web platform (Next.js) and cross-platform mobile app (React Native/Expo) for a role-based gated community ecosystem, featuring Socket.IO real-time messaging, biometric auth, FCM push notifications, and granular access control.

- **NS Arise (EdTech Platform - Frontend Developer):** Collaborated with Lead Frontend Developer on Next.js web application in a Turborepo monorepo, implementing user dashboards, AI RAG companion components, and analytics UI.
- **Adisa (SME Finance & Inventory):** Architected cross-platform React Native (Expo) SME finance app with expense approvals, bookkeeping dashboards, and on-device ML Kit OCR to digitize inventory.

#### Software Developer — Freelancing      March 2025 – Present

- **SaaS Platform:** Architected multi-tenant SaaS workforce management platform (NestJS, React Native/Expo, Next.js, PostgreSQL with RLS, Redis, BullMQ) covering role-based access and subscription billing.
- **Client Web Platforms:** Designed and built custom web applications using Next.js and Sanity CMS for SYTO Ghana (5.0 rebrand & partner digitization workflow) and Biotropical Ghana.
- **AI Integration:** Built AI-assisted automation workflows using Anthropic API with WhatsApp/SMS as low-bandwidth interface layers.

## SELECTED HIGHLIGHTS

---

- **Security-critical systems:** Designed a hash-chained, append-only audit log with tamper detection and enforced separation of duties on money-out flows.
- **Payments:** Integrated Paystack transfers with webhook reconciliation and multi-step, 2FA-gated approvals.
- **Breadth:** Shipped to web (Next.js), mobile (React Native/Expo), and desktop (Tauri) — often on the same product.
- **Scale of contribution:** 850+ commits across 15 products spanning backend, frontend, and mobile.

## SELECTED PROJECTS

---

- **Pigeon Ultra — Logistics & On-Demand Delivery Suite:** Built App Router marketing site with blog/CMS & anti-spam contact system, admin desktop portal (Tauri 2 / Next.js 15) with bulk actions & order dispatch, and courier/customer mobile apps (React Native / Expo) with search, onboarding tours, and OTP recovery.
- **Kuro — Property & Community Ecosystem:** Web (Next.js) and mobile (React Native/Expo) platform for gated estates featuring Socket.IO real-time chat, FCM push notifications, biometric auth, and role-gated access control.
- **OneMillion — Crowdfunding Ecosystem:** End-to-end crowdfunding suite (NestJS, GraphQL, React Native, Tauri) featuring 2FA, Paystack payouts, JS-to-TS home page migration with full SEO, and cryptographic audit log verification.
- **NS Arise — EdTech Learning Platform:** Next.js UI modules, student portal features, AI companion views, and data charts within a Turborepo setup.
- **Adisa — SME Finance & Inventory App:** React Native financial dashboard with spend approval flows and camera-based OCR scanning.
- **SYTO Ghana — Organizational Website & Rebrand:** Designed brand strategy, sitemap architecture, and partner digitization workflow using Next.js and Sanity CMS.
- **Eventify — Event Ticketing Platform:** Authored core auth, event pages, creation flows, and dual-currency pricing using Next.js, Drizzle ORM, and Neon PostgreSQL.
- **Pappysko — Real-Estate Marketplace:** Integrated Google Maps property search, listing lifecycles, and real-time chat with document uploads (Next.js + Socket.IO).

## EDUCATION

---

### BSc. Computer Science      Jan 2021 – Sept 2024

Kwame Nkrumah University of Science and Technology (KNUST), Kumasi, Ghana

### W.A.S.S.C.E (General Science )      Oct 2016 – Jun 2019

Asanteman Senior High School, Kumasi, Ghana
